

## School Quality/Student Success Indicator

| Data Source  | Grade Spans                  | Grades Currently In System | Annual Measurement?                       | Disaggregation by Student Group?  | Statewide?                                       |
|--|------------------------------|----------------------------|---|---|--|
| Attendance Data                                      | Elementary, Middle, and High | K-12                       | Yes                                       | Yes   | Yes  |
| Disciplinary Incident Reporting System (DIRS)        | Elementary, Middle, and High | K-12                       | Yes                                       | Yes   | Not all schools submit data                      |
| Minnesota Student Survey (MSS)                       | Elementary, Middle, and High | 5, 8, 9, and 11            | No  | Student group data is self-reported by students, so may not match other systems | Available statewide, but not used by all schools |
| Concurrent Enrollment                                | High                         | 9-12                       | Yes                                       | Yes   | Not all schools participate                      |
| International Baccalaureate (IB)                     | High                         | 11-12                      | Yes                                       | Yes   | Not all schools participate                      |
| Advanced Placement (AP) Exams                        | High                         | 9-12                       | Yes                                       | Yes   | Not all schools participate                      |
| Career and Technical Education (CTE)                 | High                         | 9-12                       | Yes                                       | Yes   | Not all schools participate                      |
| Statewide Longitudinal Education Data System (SLEDS) | High                         | K-16 (only 9-16 reported)  | Yes, although often with significant lags | Yes   | Depends on data type                             |
